HYDROLYZED COLLAGEN NATICOL® is a premium quality ingredient sourced from sustainable aquaculture and wild fisheries. Each serving contains 10 g or 15 g of highly bioavailable collagen peptides derived from enzymatic hydrolysis of fish. Naticol® is a world-renowned, clinically proven and widely used ingredient in nutricosmetics and anti-aging products. Numerous clinical studies conducted by the manufacturer of this ingredient, Weishardt International, have proven the effectiveness of Naticol® in supporting the skin – collagen peptides help maintain skin beauty and restore collagen reserves. Its daily use contributes to the maintenance of normal skin and supports skin elasticity and firmness.

VITAMINS AND MINERALS

Beyond high-quality collagen, our formulas deliver a robust spectrum of vital nutrients, including zinc and selenium. We utilize Selenium SeLECT®, a premium, patented, and highly bioavailable form of selenium methionine, developed by SABINSA. This is paired with an optimized blend of biotin, vitamin C and other vitamins and minerals to support your daily wellness from within.

Storage & warnings: Keep in a cool, dry place up to 25°C, away from direct sunlight and heat. Store out of sight and reach of children. Do not exceed the recommended daily dose. Food supplements should not replace a balanced diet.

Claims on the packaging

- **Collagen peptides Naticol®** is a premium ingredient sourced from sustainable aquaculture and wild fisheries. Product contains highly bioavailable collagen peptides, obtained through enzymatic hydrolysis from fish. Naticol® is a world-renowned, clinically tested and widely used ingredient in nutricosmetics and anti-aging products.
- **Vitamin C** supports the normal function of the immune system and contributes to the normal formation of collagen, which is necessary for the normal function of bones, cartilage, gums, and skin.

- **Vitamin D** contributes to the normal function of the immune system.
- **Vitamin A** contributes to the maintenance of normal vision, normal function of the immune system, normal skin and mucous membranes.

DORENA PREMIUM LIQUID NUTRICOSMETICS SYSTEM

Dorena is not a traditional vitamin brand. Most products on the market are multi -vitamin blends with many ingredients in one formula, which creates overlap and are not structured for systemic use. The Dorena model is based on a structured architecture of Foundation and six functional Boost products. Collagen is the central product, while the other products complement it without the risk of micronutrient overdose.
